

e-Tips for Families

Practicing Safety Online

The thoughts of what your child might come across online can be worrying. Talk about your concerns with them and come up with rules for internet use in your home.

A few tips for success:

1. Discover the internet together - let your child show you what they like to do online.
2. Discuss how to treat personal information (name, address, telephone, e-mail).
3. Discuss how to behave towards others when gaming, chatting, emailing or messaging.
4. Talk about how to evaluate and think critically about information found online.
